EDUCATION

- Masai

Full Stack Web Development

- Courses:** Python Programming, Data Structures and Algorithms, Databases, React.js

India

April 2024 - December 2024
 - Yeshwantrao Chavan College of Engineering

Bachelor of Engineering in Computer Technology; CGPA - 7.34

- Courses:** Operating Systems, Data Structures, Networking, Databases, Web Development Fundamentals

India

July 2019 - June 2023

SKILLS SUMMARY

- Front-End:** HTML, CSS, JavaScript, Python, React.js
- Libraries:** Redux, React Query, Tailwind CSS
- Programming Language:** JavaScript, Python
- Tools & Technologies:** GitHub Actions, REST APIs, Figma, SEO, Debugging
- Core CS Concepts:** Data Structures and Algorithms

EXPERIENCE

- Pazago

Front-End Engineer (Full-Time)

- API Optimization with React Query:** Utilised React Query's `useQuery` hook to cache and manage frequently accessed API data, eliminating unnecessary API calls. Reduced network requests by over 50% and improved perceived performance by 30%.
 - UI Fixes and Client-Specific Forms:** Resolved UI issues and developed customised order and document forms tailored to client requirements. Enhanced performance by using debouncing and React Query. Built dynamic features from JSON configurations and reusable components, improving maintainability and development speed.
 - Dynamic Component Architecture:** Created modular React components enforcing the DRY principle. Reduced code duplication by 40% and accelerated feature delivery by 35%, improving maintainability and team productivity.

Mumbai

December 2024 - July 2025

PROJECTS

- VisionBoard

This project is an interactive whiteboard application with drawing tools, sticky notes, and flexible canvas management. It delivers an intuitive and engaging experience for users.

- Deployed Link:** <https://unit4project.netlify.app/>
 - GitHub Repo:** https://github.com/manojRawat5/VISION_BOARD
 - Overview:** Created a modular whiteboard application with drawing tools, sticky notes, and flexible canvas management.
 - Team Collaboration:** Worked with a cross-functional team of 4, ensuring seamless collaboration and timely delivery.
 - Code Quality:** Improved code readability by 40% through a modular component-based architecture and consistent naming.
 - UI & UX:** Led creation of an engaging landing page, increasing initial user engagement by 25% and ensuring full responsiveness.
 - Weekend Planner

A weekend planning web application allowing users to organise and manage activities. Features include a landing page, date selection, and trip planning tools, built with JavaScript, HTML5, CSS3, and React for a responsive interface.

- Deployed Link:** <https://weekend-trip-anho.vercel.app/>
 - GitHub Repo:** <https://github.com/weekend-planner/>
 - Overview:** Built a responsive weekend planning app with landing page, date selection, and trip planning features.
 - UI & UX:** Led creation of a user-friendly landing page, boosting engagement by 25% with full responsiveness.
 - Feature Implementation:** Added dynamic date selection and trip organisation for improved usability.
 - Code Quality:** Maintained clean, modular code for scalability and easy maintenance.
