Location: Maharashtra, India

EDUCATION

- Masai

Full Stack Web Development

Courses: Python Programming, Data Structures and Algorithms, Databases, React.js

India

April 2024 - December 2024
- Yeshwantrao Chavan College of Engineering

Bachelor of Engineering in Computer Technology; CGPA - 7.34

Courses: Operating Systems, Data Structures, Networking, Databases, Web Development Fundamentals

India

July 2019 - June 2023

SKILLS SUMMARY

- **Front-End:** HTML, CSS, JavaScript, Python, React.js
- **Libraries:** Redux, React Query, Tailwind CSS
- **Programming Language:** JavaScript, Python
- **Tools & Technologies:** GitHub Actions, REST APIs, Figma, SEO, Debugging
- **Core CS Concepts:** Data Structures and Algorithms

EXPERIENCE

- Pazago

Front-End Engineer (Full-Time)

API Optimization with React Query: Utilised React Query’s useQuery hook to cache and manage frequently accessed API data, eliminating unnecessary API calls. Reduced network requests by over 50% and improved perceived performance by 30%.

UI Fixes and Client-Specific Forms: Resolved UI issues and developed customised order and document forms tailored to client requirements. Enhanced performance by using debouncing and React Query. Built dynamic features from JSON configurations and reusable components, improving maintainability and development speed.

Dynamic Component Architecture: Created modular React components enforcing the DRY principle. Reduced code duplication by 40% and accelerated feature delivery by 35%, improving maintainability and team productivity.

Mumbai

December 2024 - July 2025

PROJECTS

- VisionBoard

Deployed Link: <https://unit4project.netlify.app/>

GitHub Repo: https://github.com/manojRawat5/VISION_BOARD

Overview: Created a modular whiteboard application with drawing tools, sticky notes, and flexible canvas management, designed for individual use.

Contributions: Led the creation of an engaging landing page, enhancing initial user engagement by 25% and ensuring full responsiveness across all devices

Responsibilities: Collaborated with a cross-functional team of 4, ensured code quality, maintained deadlines, and delivered responsive UI components.

Tech Stack: JavaScript, HTML5, CSS, Local Storage, Netlify Deployment.

Code Quality: Improved readability and maintainability by 40% through modular component-based architecture and consistent naming conventions.

Weekend Planner

Deployed Link: <https://weekend-trip-anho.vercel.app/>

GitHub Repo: https://github.com/manoharv2512/Code.Compass_019

Overview: Built a responsive weekend planning app with a landing page, dynamic date selection, and trip planning features.

Contributions: Designed a user-friendly landing page, boosting engagement by 25% and ensuring full responsiveness across devices.

Responsibilities: Worked together with the team to ensure timely delivery, preserved code quality, and implemented responsive UI components.

Tech Stack: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Netlify Deployment.

Code Quality: Kept clean, modular code for scalability, readability, and easy future maintenance.

WatchCraft

Live Demo: <https://lucent-frangipane-e62ae6.netlify.app/>

GitHub Repo: https://github.com/AbhishekMandal1997/Federalism-Frontend_016-

Overview: Developed an interactive e-commerce platform with detailed product pages, clear specifications, and responsive design.

Contributions: Enhanced engagement using animations, smooth transitions, and responsive layout for all devices

Responsibilities: Cooperated with the team to integrate features and ensure seamless user experience.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, Animations (hover effects, smooth transitions).
