Mobile: +91 9325753406

Location: Maharashtra, India

EDUCATION

- Masai** India
Full Stack Web Development April 2024 - December 2024
 - Courses:** Python Programming, Javascript, MongoDB Database, React.js, Html ,Css, Sql
- Yeshwantrao Chavan College of Engineering** India
Bachelor of Engineering in Computer Technology; CGPA - 7.34 July 2019 - June 2023

SKILLS SUMMARY

- Full Stack Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Sql
- Libraries & Frameworks:** React Query, Axios, Tailwind CSS, Redux Toolkit
- Programming Languages:** JavaScript, Python, typescript
- Tools & Technologies:** Git, GitHub Actions, REST APIs, JWT Authentication, Bcrypt, Debugging, Vercel Deployment

EXPERIENCE

- Pazago** Mumbai
Front-End Engineer (Full-Time) December 2024 - July 2025
 - API Optimization with React Query:** Utilised React Query's `useQuery` hook to cache and manage frequently accessed API data, eliminating unnecessary API calls. Reduced network requests by over 50% and improved perceived performance by 30%.
 - UI Fixes and Client-Specific Forms:** Resolved UI issues and developed customised order and document forms tailored to client requirements. Enhanced performance by using debouncing and React Query. Built dynamic features from JSON configurations and reusable components, improving maintainability and development speed.
 - Dynamic Component Architecture:** Created modular React components enforcing the DRY principle. Reduced code duplication by 40% and accelerated feature delivery by 35%, improving maintainability and team productivity.

PROJECTS

- StyleVerse – Full Stack Clothing E-commerce Web Application**
 - Live Demo:** <https://styleverse-frontend-app.vercel.app/>
 - GitHub Repo:** https://github.com/maheshtidgam/Ecommerce_site
 - Overview:** Developed a full-stack clothing e-commerce platform for men, women, and kids, allowing users to browse, search, and purchase apparel with secure authentication and smooth shopping experience.
 - Contributions:** Implemented secure user authentication using JWT for session management and bcrypt for password encryption, ensuring strong data protection and user privacy.
 - Responsibilities:** Built RESTful APIs for user accounts, products, cart, and order management using Express.js and MongoDB. Developed a responsive React frontend with category-based filtering, dynamic cart updates, and protected routes.
 - Tech Stack:** MongoDB, Express.js, React.js, Node.js, JWT, Bcrypt, Tailwind CSS.
 - Deployment:** Fully deployed both frontend and backend on Vercel, integrated with MongoDB Atlas for cloud data storage.
- Weekend Planner**
 - Deployed Link:** <https://weekend-trip-anho.vercel.app/>
 - GitHub Repo:** https://github.com/manoharv2512/Code_Compass_019
 - Overview:** Built a responsive weekend planning app with a landing page, dynamic date selection, and trip planning features.
 - Contributions:** Designed a user-friendly landing page, boosting engagement by 25% and ensuring full responsiveness across devices.
 - Responsibilities:** Worked together with the team to ensure timely delivery, preserved code quality, and implemented responsive UI components.
 - Tech Stack:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Netlify Deployment.
 - Code Quality:** Kept clean, modular code for scalability, readability, and easy future maintenance.
- VisionBoard**
 - Deployed Link:** <https://unit4project.netlify.app/>
 - GitHub Repo:** https://github.com/manojRawat5/VISION_BOARD
 - Overview:** Created a modular whiteboard application with drawing tools, sticky notes, and flexible canvas management, designed for individual use.
 - Contributions:** Led the creation of an engaging landing page, enhancing initial user engagement by 25% and ensuring full responsiveness across all devices
 - Responsibilities:** Collaborated with a cross-functional team of 4, ensured code quality, maintained deadlines, and delivered responsive UI components.
 - Tech Stack:** JavaScript, HTML5, CSS, Local Storage, Netlify Deployment.
 - Code Quality:** Improved readability and maintainability by 40% through modular component-based architecture and consistent naming conventions.
